

The Impact of Transportation Industry On Growth: The Case of OECD Countries

Sevgi Sezer ¹

Abstract

In the present study, the correlation between the transportation industry and economic growth in OECD countries that includes Turkey, will be discussed. The study will be carried out with panel data analysis on annual data for the 1995-2017 period. Based on the obtained results, policy recommendations, especially for the transportation industry in Turkey, will be made.

Keywords: Transportation industry, Economic Growth, Panel Data Analysis
